

Facts about EGUSIN®

EGUSIN® Products include two formulations:

EGUSIN SLH® Powder
EGUSIN 250® Pellets

EGUSIN SLH® and EGUSIN 250® are natural dietetic feed supplements which have been demonstrated to be beneficial¹ in promoting a healthy stomach and an aid in preventing the destruction of the stomach lining associated with gastro-intestinal disorders. EGUSIN® supplements contain a combination of ingredients that not only addresses the primary causes of gastro-intestinal disturbances but also avoids their recurrence.

EGUSIN® Features and Benefits:

EGUSIN® provides a successful dietetic feed by:

- Re-establishment of healthy mucosa and prevention of continued destruction with each application
- Contains dietetic soluble fibers, which improve intestinal function
- Easy to administer, no waste dustless top dress
- Palatable formulation that is mixed into feed concentrate, that horses eat willingly
- Contains no prohibited drugs

EGUSIN® can be administered in periods when horses are in training or participating in competitions, as the product does not contain any drugs or substances prohibited by the Jockey Club, and there are no known undesirable adverse effects.

How does EGUSIN® Work?

The active dietary ingredients in EGUSIN® contain a unique 5-fold mode of action:

- Antacids- which are known to be gastric acid neutralizing buffers which provide instant and sustained neutralization of excess corrosive gastric acid to protect the stomach lining against destruction
- Lecithin- a phospholipid proven to protect the hydrophobic lining of the gastric mucosal membranes and epithelial surfaces against destruction from corrosive gastric acid
- Pectin- acts as a barrier for the gastric mucosal membranes against excess gastric acid
- Dietetic fibers- stabilize the function of the stomach and stimulate the appetite
- Micro-milled whole oats (groats) with a high content of fibers- having a positive dietetic impact on the intestinal system

What makes the EGUSIN® formulations unique?

In addition to the unique combination of selected antacids, dietary supplements and fibers, both EGUSIN® products contain micro-milled whole oats (groats).

The nutritional health benefits of oats have been accepted for centuries. Egusin contains a unique micro-milled whole oats meal-which allows the oats to retain a high proportion of valuable dietetic fibers and nutritional components.

Beneficial dietetic fibers and nutritional components:

- Beta-glucan- gels in the stomach, acting as a coating for the stomach lining.
- Insoluble oats fibers- delay the stomach emptying which aids in preventing gastrointestinal disorders.
- Polar lipids- rich phospholipids aid in re-establishing the stomach lining.
- Natural antioxidants- aid in protecting the muscle cells from degradation by the free radicals.

How to Use EGUSIN® Formulations:

EGUSIN SLH®: Use as an aid in the treatment of “stress stomach”.

For adult horses: administer 2 scoops daily (approximately 230 grams); divided into 1 scoop in the morning and 1 scoop in the evening for a period of 21 days. After the 21 day treatment with Egusin SLH®, it is recommended to use Egusin 250® to avoid recurrence of gastro-intestinal disturbances.

EGUSIN 250®: Use as an aid in the prevention and recurrence of “stress stomach”.

For foals and young horses (4-12 months): administer 1 scoop daily (approximately 125 grams); divided into ½ a scoop in the morning and ½ a scoop in the evening for a minimum of 21 days.

Horses in Training: Administer 2 scoops daily (approximately 250 grams); divided into 1 scoop in the morning and one scoop in the evening for a minimum of 21 days.

EGUSIN® is an AFFORDABLE- NATURAL ALTERNATIVE to other regimens
